# HTML TAGS

**Exercise 01**

Write an HTML code for the below table

Student Records

| Student ID | Student Name | Degree |
|---|---|---|
| 1002323 | Nimesh Fernando | BSc in IT |
| 1002424 | Lasadun Bandara | BSc in Computer Science |

```
<html>
      <head>
      </head>
      <body>
            <h3>Student Records</h3>
                  <table>
                        <tr>
                              <th>Student ID</th>
                              <th>Student Name</th>
                              <th>Degree</th>
                        </tr>
                        <tr>
                              <th>1002323</th>
                              <th>Nimesh Fernando</th>
                              <th>Bsc in IT</th>
                        </tr>
                        <tr>
                              <th>1002424</th>
                              <th>Lasadun Bandara</th>
                              <th>BSc in Computer Science</th>
                        </tr>
      </body>
</html>
```

**Exercise 02**

Write a html code to get the output.

```
Programming languages

   I.    C
  II.    C#
 III.    C++
```

IV.	JAVA
V.	PYTHON

```html
<html>
    <head>
    </head>
    <body>
            <h4>Programming Language</h4>
                    <ol type="I">
                            <li>C</li>
                            <li>C#</li>
                            <li>C++</li>
                            <li>JAVA</li>
                            <li>PYTHON</li>
                    </ol>
    </body>
</html>
```

**Exercise 03**

Write an HTML program to create a form as the following

Name
Index Number

```html
<html>

    <head>

    </head>

    <body>

            <h2>HTML FORM</h2>

                    <form>

                            <label>First Name</lable><br>

                                    <input value="enter Your Name" ><br>

                            <label>Index Number</label>

                                    <input value="Enter your Index Number"><br>

                    </form>

    </body>

</html>
```
